SSC
Shri Pakwasa Gujrati Girls High School
2018   *83.20%*

PERSONAL PROJECTS

Heart Disease Prediction Using Machine Learning
- Developed a machine learning model with 87% accuracy to predict heart disease risk from medical data.
- By using this model, healthcare providers can identify and address potential heart issues early, leading to better patient care and more efficient healthcare.

Personal Portfolio website
- This project highlights my creativity and technical skills in designing an interactive photography portfolio website.
- The website serves as a dynamic showcase of my photography work, providing an engaging and immersive experience for visitors.

World Travel Website
- This project showcases my expertise in designing and developing a comprehensive travel website that offers users a seamless experience to explore destinations, plan trips, and access valuable travel information.

WORK EXPERIENCE

Martian Intern
